Subject index

Methods and constructs

Theoretical

Computational methods for electronic structure

Electronic and structural properties of CaH_2: an ab initio Hartree–Fock study, A. El Gridani and M. El Mouhtadi 252 (2000) 1

Determination of protonation sites in bases from topological rules, F. Fuster and B. Silvi 252 (2000) 279

Dielectric relaxation and molecular conformational energy of some arylazo benzothiazine derivatives, M. Kozłowski, H.A. Kołodziej, R. Wieczorek, Z. Latajka and A. Jurlewicz 252 (2000) 289

Some regularities of vibrational spectra of a weak hydrogen bond: cooperative and 'anticooperative' effects within the framework of an electrostatic model, N.D. Sokolov and V.A. Savel'ev 252 (2000) 393

-CI and valence bond approach

Theoretical spectroscopic data of the HO_2^+ ion, J.M. Robbe, M. Monnerville, G. Chambaud, P. Rosmus and P.J. Knowles 252 (2000) 9

-perturbative and many body approaches

The attractive quartet potential energy surface for the $CH_3C(a\,^4A_2) + CO$ reaction, H. Hou, B. Wang and Y. Gu 252 (2000) 17

Oxygen absorption below and near the Herzberg I continuum. Ab initio calculation of the transitions probability from metastable states., B.F. Minaev 252 (2000) 25

-density functional theory

A theoretical study of plutonium diketone complexes for solvent extraction, L. Gagliardi, N.C. Handy, C.-K. Skylaris and A. Willetts 252 (2000) 47

DFT and HF–DFT calculations of ^{14}N quadrupole coupling constants in molecules, W.C. Bailey 252 (2000) 57

Semiempirical methods

Dielectric relaxation and molecular conformational energy of some arylazo benzothiazine derivatives, M. Kozłowski, H.A. Kołodziej, R. Wieczorek, Z. Latajka and A. Jurlewicz 252 (2000) 289

Transition intensities in rare gas triatomic ions: DIM versus point-charge approximation, F.Y. Naumkin 252 (2000) 301

PII: S0301-0104(00)00012-4

Algebraic approaches
A classical algebraic approach to the bend motion of acetylene: the formalism by two coupled cosets, G. Wu 252 (2000) 315

Relativistic electronic structure theory
A theoretical study of plutonium diketone complexes for solvent extraction, L. Gagliardi, N.C. Handy, C.-K. Skylaris and A. Willetts 252 (2000) 47

Wavefunctions for highly excited and unbound states
Gaussian Type Orbitals basis sets for the calculation of continuum properties in molecules: the differential photoionization cross section of acetylene, I. Cacelli, R. Moccia and A. Rizzo 252 (2000) 67

Spin states and magnetic interactions
Oxygen absorption below and near the Herzberg I continuum. Ab initio calculation of the transitions probability from metastable states., B.F. Minaev 252 (2000) 25
Calculation of CIDNP field dependences in biradicals in the photolysis of large-ring cycloalkanones, A.V. Popov, P.A. Purtov and A.V. Yurkovskaya 252 (2000) 83
Motional effects on optimum coherence transfer in ^{2}H MAS NMR spectroscopy, J.H. Kristensen, G.L. Hoatson and R.L. Vold 252 (2000) 97

Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)
Oxygen absorption below and near the Herzberg I continuum. Ab initio calculation of the transitions probability from metastable states., B.F. Minaev 252 (2000) 25
Electron–photon field dynamics: numerically exact calculations of multi-state molecule systems interacting with a single-mode coherent photon field, M. Nakano and K. Yamaguchi 252 (2000) 115
Molecular motions in molecular glasses as studied by thermally stimulated depolarisation currents (TSDC), N.T. Correia, C. Alvarez, J.J. Moura Ramos and M. Descamps 252 (2000) 151
Zwitterionic polymers for nonlinear optics, C. Combellas, F. Kajzar, G. Mathey, M.A. Petit and A. Thiébault 252 (2000) 165

Radiative (incl. relativistic) effects on molecules and molecular processes
Oxygen absorption below and near the Herzberg I continuum. Ab initio calculation of the transitions probability from metastable states., B.F. Minaev 252 (2000) 25
Gaussian Type Orbitals basis sets for the calculation of continuum properties in molecules: the differential photoionization cross section of acetylene, I. Cacelli, R. Moccia and A. Rizzo 252 (2000) 67

Scattering of waves and particles
Dynamical Lie algebraic approach to rotationally inelastic scattering of molecules from surfaces , D. Guan, X. Yi, Y. Zheng, S. Ding and J. Sun 252 (2000) 179

Collisional and reactive molecular dynamics with non-frictional forces
Time-dependent quantum dynamics study of reactive scattering of the HD + CN system in the potential averaged 5D model, Y. Zhang, Z. Tan, H. Zhang, Q. Zhang and J.Z.H. Zhang 252 (2000) 191

Reactive molecular dynamics including dissipative processes
Coupling of diffusion and reaction in the process of capillary formation in alginate gel, H. Treml and H.-H. Kohler 252 (2000) 199
Effect of collisions on the orientational relaxation of photofragments, A.P. Blokhin and M.F. Gelin 252 (2000) 323

Intramolecular dynamics
The predissociation dynamics of vibrational eigenstates in the $A\,^2\Sigma^+$ state of HBr^+ ions: numerical solution of coupled time-dependent Schrödinger equations, M.V. Korolkov and K.-M. Weitzel 252 (2000) 209
A classical algebraic approach to the bend motion of acetylene: the formalism by two coupled cosets, G. Wu 252 (2000) 315

Molecular dynamics of many particle systems and condensed phases
The structure of liquid clusters of Lennard-Jones atoms, B.G. Moore and A.A. Al-Quraishi 252 (2000) 337
The solvent influence on the electrochemical transfer of divalent ions, O. Pecina and W. Schmickler 252 (2000) 349

Dynamics of structures, lattices and macromolecular conformations
Coupling of diffusion and reaction in the process of capillary formation in alginate gel, H. Treml and H.-H. Kohler 252 (2000) 199

Fluctuations and random processes
Stretched exponentials and barrier distributions, O. Edholm and C. Blomberg 252 (2000) 221

Non-equilibrium statistical mechanics
Stretched exponentials and barrier distributions, O. Edholm and C. Blomberg 252 (2000) 221
Self-diffusion in liquid metals, A.S. Chauhan, R. Ravi and R.P. Chhabra 252 (2000) 227
Effect of collisions on the orientational relaxation of photofragments, A.P. Blokhin and M.F. Gelin 252 (2000) 323

Time and space correlation functions
Effect of collisions on the orientational relaxation of photofragments, A.P. Blokhin and M.F. Gelin 252 (2000) 323

Experiment

Magnetic resonances
Calculation of CIDNP field dependences in biradicals in the photolysis of large-ring cycloalkanones, A.V. Popov, P.A. Purtov and A.V. Yurkovskaya 252 (2000) 83
Motional effects on optimum coherence transfer in ^2H MAS NMR spectroscopy, J.H. Kristensen, G.L. Hoatson and R.L. Vold 252 (2000) 97

Molecular spectroscopy
Oxygen absorption below and near the Herzberg I continuum. Ab initio calculation of the transitions probability from metastable states., B.F. Minaev 252 (2000) 25
Temperature-independent onset of diffusion control during polymerization in a diepoxide–amine mixture by dielectric measurements, J.G. McAnanama, D.A. Wasylyshyn and G.P. Johari 252 (2000) 237

Reassignment of ground and first excited state vibrations in phenol, W. Roth, P. Imhof, M. Gerhards, S. Schumm and K. Kleinermanns 252 (2000) 247
Dielectric relaxation and molecular conformational energy of some arylazo benzothiazine derivatives, M. Kozłowski, H.A. Kołodziej, R. Wieczorek, Z. Latajka and A. Jurlewicz 252 (2000) 289

-microwave
DFT and HF–DFT calculations of ^{14}N quadrupole coupling constants in molecules, W.C. Bailey 252 (2000) 57

-UV
Quantitative studies of the photoabsorption of carbonyl sulphide in the valence-shell, S 2p, 2s and C 1s inner-shell regions (4–360 eV) by dipole electron impact spectroscopies, R. Feng, G. Cooper and C.E. Brion 252 (2000) 359

Photoelectron and Auger spectroscopy
An experimental and theoretical study of the valence shell photoelectron spectrum of bromobenzene, D.M.P. Holland, D. Edvardsson, L. Karlsson, R. Maripuu, K. Siegbahn, A.W. Potts and W. von Niessen 252 (2000) 257

Electron impact spectroscopy
Quantitative studies of the photoabsorption of carbonyl sulphide in the valence-shell, S 2p, 2s and C 1s inner-shell regions (4–360 eV) by dipole electron impact spectroscopies, R. Feng, G. Cooper and C.E. Brion 252 (2000) 359

Laser induced fluorescence
Reassignment of ground and first excited state vibrations in phenol, W. Roth, P. Imhof, M. Gerhards, S. Schumm and K. Kleinermanns 252 (2000) 247
Magnetic fluorescence quenching of the NO β(0–9) transition, V.I. Makarov, I.V. Khmelinskii, S.A. Kochubei and V.N. Ishchenko 252 (2000) 379

Ultrafast measurements
Effect of collisions on the orientational relaxation of photofragments, A.P. Blokhin and M.F. Gelin 252 (2000) 323

Nonlinear optics and spectroscopy
Zwitterionic polymers for nonlinear optics, C. Combellas, F. Kajzar, G. Mathey, M.A. Petit and A. Thiébault 252 (2000) 165

Synchrotron spectroscopies
An experimental and theoretical study of the valence shell photoelectron spectrum of bromobenzene, D.M.P. Holland, D. Edvardsson, L. Karlsson, R. Maripuu, K. Siegbahn, A.W. Potts and W. von Niessen 252 (2000) 257

Multiple resonance spectroscopy
Reassignment of ground and first excited state vibrations in phenol, W. Roth, P. Imhof, M. Gerhards, S. Schumm and K. Kleinermanns 252 (2000) 247

Atomic and molecular beam techniques
Dynamical Lie algebraic approach to rotationally inelastic scattering of molecules from surfaces , D. Guan, X. Yi, Y. Zheng, S. Ding and J. Sun 252 (2000) 179

Measurement of macroscopic variables
Self-diffusion in liquid metals, A.S. Chauhan, R. Ravi and R.P. Chhabra 252 (2000) 227

Objects

Bulk systems

Gases
The attractive quartet potential energy surface for the $CH_3C(a\,^4A_2)$ + CO reaction, H. Hou, B. Wang and Y. Gu 252 (2000) 17
Electron–photon field dynamics: numerically exact calculations of multi-state molecule systems interacting with a single-mode coherent photon field, M. Nakano and K. Yamaguchi 252 (2000) 115
Time-dependent quantum dynamics study of reactive scattering of the HD + CN system in the potential averaged 5D model, Y. Zhang, Z. Tan, H. Zhang, Q. Zhang and J.Z.H. Zhang 252 (2000) 191

Supersonic beams
Reassignment of ground and first excited state vibrations in phenol, W. Roth, P. Imhof, M. Gerhards, S. Schumm and K. Kleinermanns 252 (2000) 247
The structure of liquid clusters of Lennard-Jones atoms, B.G. Moore and A.A. Al-Quraishi 252 (2000) 337

Liquid mixtures and solutions
Calculation of CIDNP field dependences in biradicals in the photolysis of large-ring cycloalkanones, A.V. Popov, P.A. Purtov and A.V. Yurkovskaya 252 (2000) 83
Temperature-independent onset of diffusion control during polymerization in a diepoxide–amine mixture by dielectric measurements, J.G. McAnanama, D.A. Wasylyshyn and G.P. Johari 252 (2000) 237
The solvent influence on the electrochemical transfer of divalent ions, O. Pecina and W. Schmickler 252 (2000) 349

Crystals
Electronic and structural properties of CaH_2: an ab initio Hartree–Fock study, A. El Gridani and M. El Mouhtadi 252 (2000) 1

Glasses
Molecular motions in molecular glasses as studied by thermally stimulated depolarisation currents (TSDC), N.T. Correia, C. Alvarez, J.J. Moura Ramos and M. Descamps 252 (2000) 151

Polymers
Zwitterionic polymers for nonlinear optics, C. Combellas, F. Kajzar, G. Mathey, M.A. Petit and A. Thiébault 252 (2000) 165

Coupling of diffusion and reaction in the process of capillary formation in alginate gel, H. Treml and H.-H. Kohler 252 (2000) 199
Temperature-independent onset of diffusion control during polymerization in a diepoxide–amine mixture by dielectric measurements, J.G. McAnanama, D.A. Wasylyshyn and G.P. Johari 252 (2000) 237

Metals and alloys
Self-diffusion in liquid metals, A.S. Chauhan, R. Ravi and R.P. Chhabra 252 (2000) 227

Thin films
Zwitterionic polymers for nonlinear optics, C. Combellas, F. Kajzar, G. Mathey, M.A. Petit and A. Thiébault 252 (2000) 165

Surfaces
Dynamical Lie algebraic approach to rotationally inelastic scattering of molecules from surfaces , D. Guan, X. Yi, Y. Zheng, S. Ding and J. Sun 252 (2000) 179

Dielectrics
Molecular motions in molecular glasses as studied by thermally stimulated depolarisation currents (TSDC), N.T. Correia, C. Alvarez, J.J. Moura Ramos and M. Descamps 252 (2000) 151
Temperature-independent onset of diffusion control during polymerization in a diepoxide–amine mixture by dielectric measurements, J.G. McAnanama, D.A. Wasylyshyn and G.P. Johari 252 (2000) 237
Dielectric relaxation and molecular conformational energy of some arylazo benzothiazine derivatives, M. Kozłowski, H.A. Kołodziej, R. Wieczorek, Z. Latajka and A. Jurlewicz 252 (2000) 289

Microscopic and mesoscopic systems

Single atoms, molecules and assemblies (incl. biological)
DFT and HF–DFT calculations of ^{14}N quadrupole coupling constants in molecules, W.C. Bailey 252 (2000) 57
Electron–photon field dynamics: numerically exact calculations of multi-state molecule systems interacting with a single-mode coherent photon field, M. Nakano and K. Yamaguchi 252 (2000) 115
Self-diffusion in liquid metals, A.S. Chauhan, R. Ravi and R.P. Chhabra 252 (2000) 227

Molecules (neutral and ionic)
Gaussian Type Orbitals basis sets for the calculation of continuum properties in molecules: the differential photoionization cross section of acetylene, I. Cacelli, R. Moccia and A. Rizzo 252 (2000) 67
Dielectric relaxation and molecular conformational energy of some arylazo benzothiazine derivatives, M. Kozłowski, H.A. Kołodziej, R. Wieczorek, Z. Latajka and A. Jurlewicz 252 (2000) 289
The solvent influence on the electrochemical transfer of divalent ions, O. Pecina and W. Schmickler 252 (2000) 349

-diatomic
The predissociation dynamics of vibrational eigenstates in the $A\,^2\Sigma^+$ state of HBr^+ ions: numerical solution of coupled time-dependent Schrödinger equations, M.V. Korolkov and K.-M. Weitzel 252 (2000) 209

Magnetic fluorescence quenching of the NO β(0–9) transition, V.I. Makarov, I.V. Khmelinskii, S.A. Kochubei and V.N. Ishchenko 252 (2000) 379

-small polyatomics

Electronic and structural properties of CaH_2: an ab initio Hartree–Fock study, A. El Gridani and M. El Mouhtadi 252 (2000) 1

Theoretical spectroscopic data of the HO_2^+ ion, J.M. Robbe, M. Monnerville, G. Chambaud, P. Rosmus and P.J. Knowles 252 (2000) 9

Time-dependent quantum dynamics study of reactive scattering of the HD + CN system in the potential averaged 5D model, Y. Zhang, Z. Tan, H. Zhang, Q. Zhang and J.Z.H. Zhang 252 (2000) 191

An experimental and theoretical study of the valence shell photoelectron spectrum of bromobenzene, D.M.P. Holland, D. Edvardsson, L. Karlsson, R. Maripuu, K. Siegbahn, A.W. Potts and W. von Niessen 252 (2000) 257

Transition intensities in rare gas triatomic ions: DIM versus point-charge approximation, F.Y. Naumkin 252 (2000) 301

Effect of collisions on the orientational relaxation of photofragments, A.P. Blokhin and M.F. Gelin 252 (2000) 323

Quantitative studies of the photoabsorption of carbonyl sulphide in the valence-shell, S 2p, 2s and C 1s inner-shell regions (4–360 eV) by dipole electron impact spectroscopies, R. Feng, G. Cooper and C.E. Brion 252 (2000) 359

-polymeric and biological

Coupling of diffusion and reaction in the process of capillary formation in alginate gel, H. Treml and H.-H. Kohler 252 (2000) 199

Molecular aggregates

Determination of protonation sites in bases from topological rules, F. Fuster and B. Silvi 252 (2000) 279

Some regularities of vibrational spectra of a weak hydrogen bond: cooperative and 'anticooperative' effects within the framework of an electrostatic model, N.D. Sokolov and V.A. Savel'ev 252 (2000) 393

-clusters

Transition intensities in rare gas triatomic ions: DIM versus point-charge approximation, F.Y. Naumkin 252 (2000) 301

The structure of liquid clusters of Lennard-Jones atoms, B.G. Moore and A.A. Al-Quraishi 252 (2000) 337

Free radicals (incl. hydronium and muonium)

Calculation of CIDNP field dependences in biradicals in the photolysis of large-ring cycloalkanones, A.V. Popov, P.A. Purtov and A.V. Yurkovskaya 252 (2000) 83

Phenomena

Molecular structure

A theoretical study of plutonium diketone complexes for solvent extraction, L. Gagliardi, N.C. Handy, C.-K. Skylaris and A. Willetts 252 (2000) 47

Vibrations and rotations of molecules

Reassignment of ground and first excited state vibrations in phenol, W. Roth, P. Imhof, M. Gerhards, S. Schumm and K. Kleinermanns 252 (2000) 247

A classical algebraic approach to the bend motion of acetylene: the formalism by two coupled cosets, G. Wu 252 (2000) 315

Electronic structure and states

Theoretical spectroscopic data of the HO_2^+ ion, J.M. Robbe, M. Monnerville, G. Chambaud, P. Rosmus and P.J. Knowles 252 (2000) 9

The attractive quartet potential energy surface for the $CH_3C(a\,^4A_2) + CO$ reaction, H. Hou, B. Wang and Y. Gu 252 (2000) 17

A theoretical study of plutonium diketone complexes for solvent extraction, L. Gagliardi, N.C. Handy, C.-K. Skylaris and A. Willetts 252 (2000) 47

An experimental and theoretical study of the valence shell photoelectron spectrum of bromobenzene, D.M.P. Holland, D. Edvardsson, L. Karlsson, R. Maripuu, K. Siegbahn, A.W. Potts and W. von Niessen 252 (2000) 257

Electric and magnetic properties

DFT and HF–DFT calculations of ^{14}N quadrupole coupling constants in molecules, W.C. Bailey 252 (2000) 57

Transition intensities in rare gas triatomic ions: DIM versus point-charge approximation, F.Y. Naumkin 252 (2000) 301

Molecular interactions

Time-dependent quantum dynamics study of reactive scattering of the HD + CN system in the potential averaged 5D model, Y. Zhang, Z. Tan, H. Zhang, Q. Zhang and J.Z.H. Zhang 252 (2000) 191

Determination of protonation sites in bases from topological rules, F. Fuster and B. Silvi 252 (2000) 279

Spectral bandshapes and intensities

Motional effects on optimum coherence transfer in ^2H MAS NMR spectroscopy, J.H. Kristensen, G.L. Hoatson and R.L. Vold 252 (2000) 97

Transition intensities in rare gas triatomic ions: DIM versus point-charge approximation, F.Y. Naumkin 252 (2000) 301

Quantitative studies of the photoabsorption of carbonyl sulphide in the valence-shell, S 2p, 2s and C 1s inner-shell regions (4–360 eV) by dipole electron impact spectroscopies, R. Feng, G. Cooper and C.E. Brion 252 (2000) 359

Energy transfer processes

A classical algebraic approach to the bend motion of acetylene: the formalism by two coupled cosets, G. Wu 252 (2000) 315

Molecular photophysical processes

An experimental and theoretical study of the valence shell photoelectron spectrum of bromobenzene, D.M.P. Holland, D. Edvardsson, L. Karlsson, R. Maripuu, K. Siegbahn, A.W. Potts and W. von Niessen 252 (2000) 257

Quantitative studies of the photoabsorption of carbonyl sulphide in the valence-shell, S 2p, 2s and C 1s inner-shell regions (4–360 eV) by dipole electron impact spectroscopies, R. Feng, G. Cooper and C.E. Brion 252 (2000) 359

Photochemistry
Effect of collisions on the orientational relaxation of photofragments, A.P. Blokhin and M.F. Gelin 252 (2000) 323

Intramolecular dynamics
The predissociation dynamics of vibrational eigenstates in the $A\,^2\Sigma^+$ state of HBr^+ ions: numerical solution of coupled time-dependent Schrödinger equations, M.V. Korolkov and K.-M. Weitzel 252 (2000) 209
Dielectric relaxation and molecular conformational energy of some arylazo benzothiazine derivatives, M. Kozłowski, H.A. Kołodziej, R. Wieczorek, Z. Latajka and A. Jurlewicz 252 (2000) 289
The solvent influence on the electrochemical transfer of divalent ions, O. Pecina and W. Schmickler 252 (2000) 349

-vibrational energy redistribution (incl. vibrational dissociation)
The predissociation dynamics of vibrational eigenstates in the $A\,^2\Sigma^+$ state of HBr^+ ions: numerical solution of coupled time-dependent Schrödinger equations, M.V. Korolkov and K.-M. Weitzel 252 (2000) 209
A classical algebraic approach to the bend motion of acetylene: the formalism by two coupled cosets, G. Wu 252 (2000) 315

Luminescence spectra, yields and lifetimes
Magnetic fluorescence quenching of the NO β(0–9) transition, V.I. Makarov, I.V. Khmelinskii, S.A. Kochubei and V.N. Ishchenko 252 (2000) 379

Nonlinear responses (incl. optical)
Zwitterionic polymers for nonlinear optics, C. Combellas, F. Kajzar, G. Mathey, M.A. Petit and A. Thiébault 252 (2000) 165

Multiphoton phenomena
Electron–photon field dynamics: numerically exact calculations of multi-state molecule systems interacting with a single-mode coherent photon field, M. Nakano and K. Yamaguchi 252 (2000) 115

Reactions (incl. dissociation)
The attractive quartet potential energy surface for the $CH_3C(a\,^4A_2) + CO$ reaction, H. Hou, B. Wang and Y. Gu 252 (2000) 17

-isolated molecules
The predissociation dynamics of vibrational eigenstates in the $A\,^2\Sigma^+$ state of HBr^+ ions: numerical solution of coupled time-dependent Schrödinger equations, M.V. Korolkov and K.-M. Weitzel 252 (2000) 209

-collisional
Time-dependent quantum dynamics study of reactive scattering of the HD + CN system in the potential averaged 5D model, Y. Zhang, Z. Tan, H. Zhang, Q. Zhang and J.Z.H. Zhang 252 (2000) 191

-condensed phase
Calculation of CIDNP field dependences in biradicals in the photolysis of large-ring cycloalkanones, A.V. Popov, P.A. Purtov and A.V. Yurkovskaya 252 (2000) 83
Temperature-independent onset of diffusion control during polymerization in a diepoxide–amine mixture by dielectric measurements, J.G. McAnanama, D.A. Wasylyshyn and G.P. Johari 252 (2000) 237

Molecular motion (incl. diffusive)
Motional effects on optimum coherence transfer in ^{2}H MAS NMR spectroscopy, J.H. Kristensen, G.L. Hoatson and R.L. Vold 252 (2000) 97
Molecular motions in molecular glasses as studied by thermally stimulated depolarisation currents (TSDC), N.T. Correia, C. Alvarez, J.J. Moura Ramos and M. Descamps 252 (2000) 151
Self-diffusion in liquid metals, A.S. Chauhan, R. Ravi and R.P. Chhabra 252 (2000) 227

Fluctuations and noise
Stretched exponentials and barrier distributions, O. Edholm and C. Blomberg 252 (2000) 221

Surface chemical physics

-surface scattering
Dynamical Lie algebraic approach to rotationally inelastic scattering of molecules from surfaces , D. Guan, X. Yi, Y. Zheng, S. Ding and J. Sun 252 (2000) 179

Structure of solids, liquids and glasses
Temperature-independent onset of diffusion control during polymerization in a diepoxide–amine mixture by dielectric measurements, J.G. McAnanama, D.A. Wasylyshyn and G.P. Johari 252 (2000) 237
The structure of liquid clusters of Lennard-Jones atoms, B.G. Moore and A.A. Al-Quraishi 252 (2000) 337

Molecular self-assembly and -organization
Coupling of diffusion and reaction in the process of capillary formation in alginate gel, H. Treml and H.-H. Kohler 252 (2000) 199
